Foresite
Cybersecurity

Optimize operations. Bridge delivers expert-managed Google SecOps with continuous tuning, rule curation, and platform optimization for maximum visibility and performance.

Version: 1.0
Revised: Oct 17, 2025

Catalyst Bridge

Catalyst Bridge

Managed Google SecOps Platform — Simplified, Optimized, and Always On

Transform Google SecOps into a seamlessly tuned, expert-managed platform for peak performance and continuous improvement.

Catalyst Bridge continuously optimizes your Google SecOps environment—covering every aspect of configuration, tuning, and integration. Operated by Foresite's practitioners, Bridge ensures reliability, visibility, and proactive enhancement of your Google-native security stack—so your team can focus on defending, not maintaining.

Ideal For

Organizations with an internal SOC or security operations team looking to offload Google SecOps management and engineering complexity to trusted experts.

Core Capabilities

Unified Telemetry & Observability (Bindplane)
Collect and normalize data from every source using Bindplane, enabling real-time visibility and control across cloud, endpoint, and on-prem environments

Curated Rule & Playbook Engineering
Custom detections, SOAR workflows, and alert hygiene tailored to your environment—ensuring precision and reduced noise

Continuous Optimization & Platform Tuning
Regular reviews, rule updates, and tuning keep Google SecOps operating at peak efficiency

Seamless Integration & Enrichment
Manage connectors, validate data, and enrich with Mandiant intelligence for complete signal context

Operational Dashboards & Reporting
Unified dashboards deliver actionable insights into detection efficacy, data health, and performance metrics

How Bridge Delivers

Operationalized performance, visibility, and platform assurance for enterprise-scale SecOps.

Platform Management & Optimization
Continuous tuning and configuration for peak performance.

Automation & Orchestration
Streamlined triage and containment workflows to reduce manual effort.

Continuous Service Improvement
Ongoing reviews and KPI tracking to sustain operational excellence.

Detection Engineering Enablement
Co-developed rules, curated detections, and SOAR playbook validation.

Data Quality & Governance
Telemetry validation and enrichment for complete signal confidence.

	Bridge
Ideal Customer Profile	Enterprise w/ In-house SOC
Channel(s)	Google, Traditional
SECURITY OPERATIONS	
24x7x365 Security Operations Center	-
Incident Response SLA	-
Managed Detection and Response	-
Foresite Catalyst Platform, Reporting, Dashboards	SecOps metrics and Platform Availability
GOOGLE SECOPS	
Managed Google SecOps	●
Detection Content	Bridge Detection Library and use case development
SOAR	Enablement and Best Effort Development
Threat Intelligence Alerting	SecOps Provided and Curated Sources
Onboarding	9-12 Week Standard Onboarding with Dedicated Engineer and PM
SERVICE ENGAGEMENT	
Dedicated Resource(s)	Security Engineer
Service Cadences (Post Onboarding)	Monthly 30 Minute Cadence with Engineer

Ideal Enterprise Use Cases

How leading enterprises operationalize Bridge.

SOC Optimization
Offload SecOps platform management while retaining in-house detection ownership.

SIEM/SOAR Modernization
Transition legacy tools to Google SecOps with expert guidance and managed tuning.

Hybrid Cloud Visibility
Normalize and enrich telemetry from multi-cloud and on-prem workloads.

SecOps Maturity Acceleration
Establish continuous improvement cycles and measurable operational KPIs.

Why Foresite for Enterprise SecOps

Practitioner-led. Enterprise-focused. Google-powered.

Foresite's Bridge service is delivered by certified Google SecOps engineers and Cyber Fusion specialists who work directly with your internal teams to enhance detection quality, reduce maintenance overhead, and maximize ROI on Google Cloud Security investments.

Ready to Optimize Google SecOps at Scale?

Bridge turns your Google Cloud security stack into a continuously tuned, expertly managed platform.
