

Foresite
Cybersecurity

Defend at Google scale. Citadel delivers 24/7 managed detection and response powered by Google SecOps—combining AI analytics, Mandiant intelligence, and expert response for nonstop protection.

Version: 1.0
Revised: Nov 4, 2025

Catalyst Citadel

Catalyst Citadel

24/7 Managed Detection & Response — Powered by Google SecOps

Citadel provides your organization with an expert 24/7 team, leveraging hyperscale MXDR visibility to contain threats of today and tomorrow.

Foresite Catalyst

Catalyst Citadel delivers continuous monitoring, threat detection, and guaranteed response across your entire security infrastructure—operating at Google scale and speed.

Powered by Google SecOps and Mandiant Threat Intelligence, Citadel provides continuous coverage, machine speed containment, and expert-led investigations from Foresite's Cyber Fusion Centers.

Google Security Operations · Mandiant · Gemini · Google Cloud

Full Threat Management, Zero Effort

Our fully managed service takes on your entire security burden, ensuring guaranteed response and advanced threat hunting across all your environments.

Core Capabilities

Intelligence-Driven 24x7x365 Triage & Monitoring
Continuous monitoring and response at machine speed with guaranteed SLAs to ensure no critical threat is missed

Unified Hyperscale Visibility (MXDR)
Ingest all your data at Google scale & speed for complete XDR visibility across cloud, endpoint, identity and on-prem, eliminating blind spots

AI-Accelerated, Human-Led Response
Human led, AI automated threat response, reducing Mean Time to Response (MTTR) from hours to minutes

Mandiant-Powered Proactive Threat Hunting
Proactive and retroactive threat hunting with Mandiant and VirusTotal intelligence, preemptively neutralizing breaches that evade automated tools

Continuous Platform Optimization & Efficacy
Evolving defense efficacy to ensure your defenses ar always optimized against the latest attacker techniques

Ideal For

- Organizations without a dedicated SOC
- Teams replacing fragmented MDR solutions
- Enterprises operationalizing Google SecOps

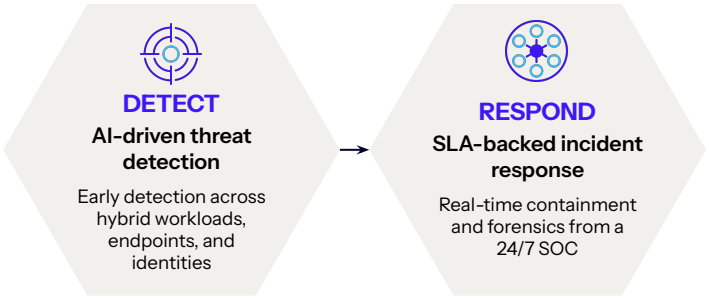
Key Outcomes

- Reduced organizational risk
- Significantly reduced alert noise and analyst fatigue
- Guaranteed accelerated MTTR with defined SLAs
- Maximized security posture and compliance readiness
- Predictable MXDR cost model
- Next-gen SIEM+SOAR fully operationalized, not just deployed

THE FORESITE SECURITY LIFECYCLE

Operationalized Detection and Response at Google Scale

Every Catalyst module aligns to the Foresite Security Lifecycle—from discovery to continuous optimization. Citadel powers the Detect and Respond phases, transforming MDR into measurable, SLA-backed outcomes.



Delivery Models – Citadel vs. Citadel Essentials

Both options are delivered 24/7 by Foresite's global Cyber Fusion Centers, powered by Google SecOps, Mandiant, and Gemini AI.

Citadel Essentials
Professional Services

Focus
Core MDR on Google SecOps

Coverage
Key log sources & alert triage

Response Model
Guided remediation

Threat Hunting
Scheduled hunts

Best For
Lean security teams

Citadel
MXDR & 24/7 SOC Response, Powered by AI

Focus
Fully managed MXDR operations

Coverage
Unified visibility across endpoint, cloud, and identity

Response Model
Foresite-led containment & forensics

Threat Hunting
Continuous Mandiant-powered threat hunting

Best For
Mature enterprises standardizing on Google Cloud

MDR, Operationalized

Citadel delivers SLA-backed response, runbook-driven collaboration, and AI-accelerated containment to close the loop between detection and action.
This is MDR that behaves like an extension of your SOC-not another alert stream.

Ready to see Citadel in Action? From detection to containment, Citadel delivers measurable outcomes and nonstop protection at Google scale.
