Foresite Security Portfolio

Foresite Security Solutions, Built for Modern Threats

Cyber Threats are Evolving – Your Security Should, Too

Foresite delivers fully managed, AI-enhanced cybersecurity solutions that help you stay ahead of threats—while staying focused on growth. From cloud to endpoint to AI, we provide end-to-end protection, real-time clarity, and continuous compliance.

Why Foresite

Foresite helps forward-thinking teams cut through the noise and take control of their security operations. We combine deep practitioner expertise, scalable technology, and industry insight to deliver outcomes that matter—faster detection, smarter response, and long-term resilience.

We're a certified Google Cloud Premier Partner and certified SecOps Service Delivery Partner, but our security is built for whatever mix of cloud, hybrid, or on-prem environments you operate in. Modular, adaptive, and always aligned to your goals.

Industries we serve include:

Technology
Financial
Healthcare
Retail
Public Sector
Education
Manufacturing
Insurance
and Legal

Challenges We Solve

Security operations are fragmented, overloaded, and reactive.

- Overwhelmed teams and alert fatigue
- Tool sprawl and misconfigured platforms
- Incomplete visibility across assets and identities
- Cloud and AI compliance risk
- Slow or missed threat response
- Manual GRC and audit overhead

Foresite helps modern teams regain clarity, reduce risk, and scale what works.

Use Cases

Where strategy meets execution.

Autonomic SecOps – Automate threat detection, triage, and response at scale

Secure Multi-Cloud Environments – Normalize telemetry, reduce blind spots, and enforce consistent controls

AI-Driven Intelligence – Leverage threat intel, behavior analytics, and AI models for proactive defense

Transform Security Operations – Consolidate fragmented tools into a unified, outcome-driven program

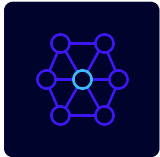

Achieve Compliance at Scale – Automate evidence collection and align with evolving frameworks

Secure AI Workloads – Enforce guardrails for LLMs, GenAI, and ML model integrity

Enterprise Security

Operational security for any environment—cloud, hybrid, or on-prem. Foresite's enterprise offerings deliver clarity, control, and continuous protection. Modular by design and mapped to strategic outcomes, each service is backed by expert delivery and platform integration.

Security Operations

24/7 managed detection & response, firewall, EDR, exposure and patch management, SOC-as-a-Service

Threat Intelligence

AI-enhanced intelligence, context-driven alert enrichment, fusion with Mandiant-grade sources via Catalyst Command

Governance, Risk & Compliance (GRC)

Compliance automation, vCISO advisory, GRC assessments, and policy management via Managed Apptega + Catalyst Nexus

Endpoint Security

All-inclusive TANIUMaaS, Tenable-as-a-Service, and more for endpoint protection and vulnerability management

Security Testing

Hybrid penetration testing, red and purple teaming, application security, and social engineering

AI Security

AI/ML pipeline protection, LLM red-teaming, policy enforcement, and secure inference monitoring (powered by Gemini, Model Armor, SCCE)

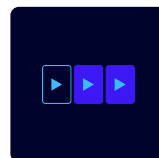

Google Cloud Security

Built for Google Cloud—designed to accelerate adoption, improve visibility, and reduce risk. Foresite's Google Cloud solutions deliver end-to-end security at cloud speed—integrated, modular, and managed by certified practitioners. Whether you're migrating, scaling, or optimizing, we align to your goals.

MDR for Google Cloud

24/7 threat detection, triage, and response—powered by Google SecOps, delivered via Catalyst Citadel

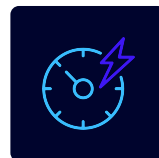

Deployment & Integration

Fast onboarding, custom rule tuning, SOAR playbooks, and telemetry ingestion with Bindplane

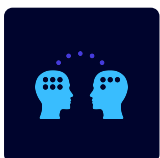

Assessments & Migrations

Architecture reviews, posture assessments, and secure migration plans—mapped to PCI, SOC, FedRAMP, and more

Manage & Monitor

Unified oversight across Google SecOps (formerly Chronicle), SCCE, and your workloads, with real-time alerting and expert-led response

Advisory & Enablement

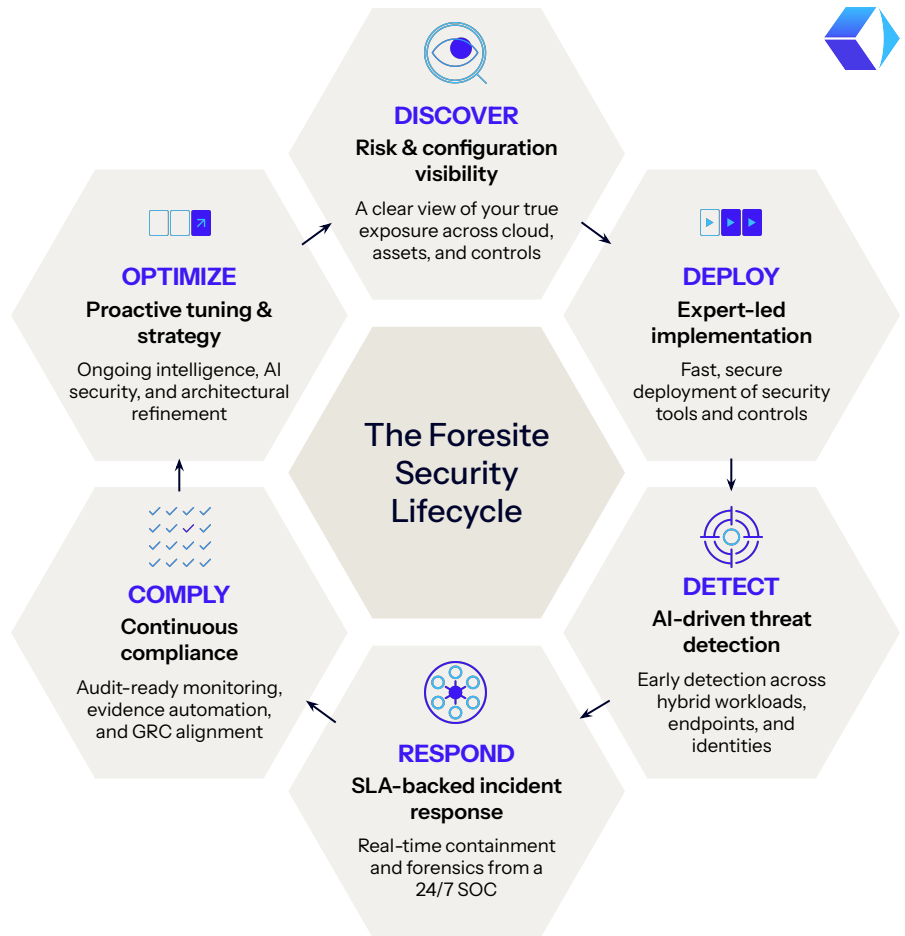

Embedded experts to align your cloud security with Zero Trust, DevSecOps, and compliance strategies

THE FORESITE SECURITY LIFECYCLE

Operational strategy, structured for outcomes.

Every Foresite solution aligns to a clear lifecycle—from discovery to optimization. This isn't theory—it's how we deliver measurable security value, at scale, for real customers every day.

SECURITY EXCELLENCE AMPLIFIED

Named SOC teams (**people**) operate the Catalyst platform (**process**) to amplify Google Cloud + Wiz (**technology**) — one column, one continuous line of defense.

Google Cloud
SecOps Delivery Partner

01 · PEOPLE

Catalyst services

Named SOC teams & security experts

Bridge

Fully managed Google SecOps platform

Citadel

MXDR & 24/7 SOC response, powered by AI

Nexus

Cloud compliance & active enforcement

Command

Threat detection & analysis, IR, dark web

Adapt

AI workload protection & attack defense

02 · PROCESS

Catalyst platform

One platform. Every module, unified.

THE AMPLIFIER

03 · TECHNOLOGY

Google Cloud + Wiz

Best-in-class security tooling

Mandiant

Threat hunting, forensics & IR

Google SecOps

Unified SIEM & SOAR at Google scale

Cloud Posture

CSPM — posture, data & compliance

Threat Intelligence

Global attack telemetry & risk insights

AI Governance

AI security posture & ISO 42001

Security That Adapts With You

Flexible delivery models for wherever you are in your journey.

Start with what matters most—like detection, compliance, or endpoint visibility—and scale as your needs evolve. Foresite meets you where you are:

MANAGED SERVICES

Fully managed 24/7 security operations and response, powered by Foresite Catalyst.

PROFESSIONAL SERVICES

Scoped deployments, assessments, and testing to reduce risk and strengthen your security posture.

ADVISORY & ENABLEMENT

Strategic guidance, architecture reviews, and compliance planning to accelerate readiness.

We make enterprise-grade protection easy to use and understand, so all organizations can stay safe.

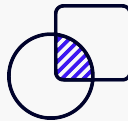

Knowledge Transfer

Named SOC Relationships

Radical Transparency

Flexible Consumption

Technical Validation

Real-World Security Outcomes

Continuous Monitoring

24/7

global SOC coverage

Threat Dwell Time

85%

faster detection

Time to Value

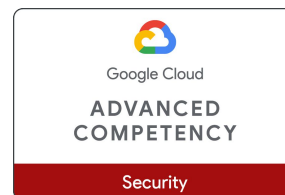

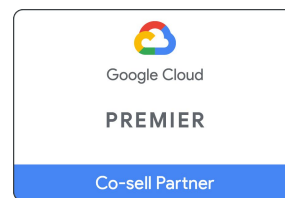

90%

faster deployment

Audit-Ready Compliance

100%

evidence readiness

Let's Build Your Security Future

Don't just check a box. Build a resilient, intelligent security program that scales with your business.
