

CASE STUDY

STATE & LOCAL GOVERNMENT

SIEM (FULLY MANAGED)

MSSP SERVICES

Business Challenges

- Internal IT team does not have cybersecurity training
- Not enough internal IT staff to cover 24/7/365
- No log storage, analysis or event monitoring in place due to lack of resources
- Diverse technology base
- IT solutions provider is not a MSSP

Foresite Solution

- ProVision 24/7/365 security monitoring & alerting
- ProVision SOC team for data analysis & threat correlation

Real Results

- Log information monitored per compliance
- Real-time threat analysis
- Remediation assistance with Incident Response Team
- Scalability

BACKGROUND

State utilities IT team was looking at System Information & Event Management (SIEM) solutions, but quickly realized they did not have the budget, ability to monitor 24/7 with internal team, or team members with the training to review log data, hunt for threats, and respond to suspicious events.

OUR SOLUTION

ProVision 24/7/365 security monitoring and alerting

ProVision provides cloud-based SIEM tool with SOC team experienced in the technologies needed to fully manage the solution

ProVision Security Operations Center (SOC) team for data analysis and threat correlation

ProVision offered by current IT provider, client can maintain that relationship and provider can assist with implementation of the solution

OUR RESULTS

Log information monitored as per compliance requirements to protect sensitive data

Initial remediation assistance included with full Incident Response team available if needed

Threat analysis in real-time with ongoing tuning of business rules

Scalability as the ProVision solution can be modified as technology changes and scope increases or decreases
